

Reach the Top with Fresh Foam

ELEVATOR CLEANING

An “Out Of Order” sign on your elevator door is a site no one wants to see. Although elevator contracts cover routine maintenance and repairs, most service providers overlook a crucial piece of upkeep that directly affects your elevator’s performance and safety - dirt and debris build up. Luckily, Fresh Foam is here to help!

Better Service, Appearance & Safety

Steam cleaning keeps your elevators looking great and running smoothly by removing dirt and grease trapped in baseplates, thresholds and tracks. Avoid any potential safety issues and possible REAC Inspection violations caused by stuck doors and other concerns. And create a fresh, clean experience for everyone who enters your elevators.

Benefits of Working With Fresh Foam

- ✓ Our tools thoroughly clean the tracks and interior cab without leaving any water or residue behind. Plus, our cleaning process does not damage your elevator’s delicate metal surfaces.
- ✓ Cleaning elevator thresholds is labor-intensive and taxing on your housekeeping and custodial staff. Our efficient cleaning process will save you time and money.
- ✓ If your property has multiple elevators, we make arrangements to only clean one elevator at a time to limit inconveniences to clients, residents and visitors.

Keep Your Elevator on the Right Track with Fresh Foam
